

# Young Crossrail Career Profile

Hi I'm Max Fieguth and I'm a Mechanical Engineer

## Joined Crossrail

July 2009

## Role in Crossrail

I am currently a Mechanical Engineer within the Chief Engineers Group of Crossrail Central.

## Company

I work for Bechtel, one of the three companies that form Crossrail Central.

## Before Crossrail

Before Crossrail I worked on the final stages of High Speed 1. I also worked briefly as part of the functional management of Bechtel Civil, supporting projects worldwide.

## Typical day

I attend design reviews, design workshops, gate reviews and coordination workshops.  
I review drawings, specifications and reports.

## Qualifications

I have a Masters in Mechanical Engineering from Imperial College London, from where I graduated in 2008.

## Describe yourself in three words

- 1 Approachable
- 2 Helpful
- 3 Efficient

## Other major projects

I worked on High Speed 1 during the close-out phase. Having lived through the final stages of such a mega-project it was a good stepping stone for my involvement in Crossrail now.

Dream job at school

Pilot

## First full-time job

My first full-time job was when I started with Bechtel in September 2008.

## Luckiest break

To actually enjoy what I picked for my studies.

## Hobbies

Watching movies, listening to movie soundtracks, dinner parties with friends, travelling and exploring.

## What will I be doing in 2017

I have not planned that far yet – I will be wherever my opportunities take me.

## Ambition

One day designing and building my own house.
